

EMPOWER YOUR EMPLOYEES

Safety And Health Training Made Easier

Choose to train your employees all at the same time with an onsite trainer, remotely with a live instructor, or at their convenience through our Online OSHA Training Center. We have qualified English and Spanish-speaking professionals nationwide.

ONSITE

Is your team concentrated at a specific location? Choose classroom based training conducted by a qualified Safety Professional.

ONLINE

Is finding time to train a challenge? Choose our Online OSHA Training Center for web-based instruction anytime, anywhere.

REMOTE

Getting everyone together in one location can be a challenge. Choose live, interactive, remote training conducted by a qualified Safety Professional.

Proudly an OSHA Star Mobile Workforce

Specialty Courses

Training courses can take anywhere from 20 minutes to 40 hours! The courses listed below are full specialty trainings that include a completion card. Let one of our representatives help you select which topics your company needs to be trained on. Training is available in English and Spanish, featuring interactive, multimedia content by real-world instructors. Your team will learn from experienced safety professionals, retired OSHA officials, CSPs, and is backed by an OSHA VPP Star mobile worksite

10 Hour OSHA Outreach: Construction or General Industry

This training covers an overview of the hazards a worker may encounter in their work environment and the basics of safety and health rules and regulations. It is intended for entry-level workers. Upon successful completion, students will receive a certification card.

30 Hour OSHA Outreach: Construction or General Industry

This training covers a more in-depth review of workplace hazard identification, prevention, and control in addition to safety and health rules and regulations. It's intended for employees with some level of safety responsibility. Upon successful completion, students receive a certification card.

Hands-On Equipment Certification

This operator certification training may cover: Forklifts, Powered Industrial Trucks, Aerial Lifts, Scissor Lifts, and Boom Lifts. We also offer a Forklift Train-the-Trainer program for in-house training.

Arc Flash

Proper training with one of our NFPA 70E trainers, we can reduce the chance of an arc flash occurring by using engineering controls, administrative controls, and appropriate personal protective equipment (PPE).

Competent Person: Trenching/Excavating

This training covers what it takes to become a competent person, including recognizing site hazards, knowing soil types, protective systems and inspections. A competent person must be authorized to take action.

Confined Space

This training covers permit vs. non-permit required confined spaces, hazardous conditions, entry requirements, and rescue procedures.

Crane Safety: Overhead, Gantry, and/or Construction Cranes

This training focuses on the key hazards for crane operation, safe operating procedures, inspection requirements, and equipment maintenance.

Falls

This training may cover: Competent Person (8 and 24 hour); Falls in Construction; Slips, Trips, Falls; Walking-Working Surfaces, and Ladder Safety. In training, we will cover the risks and prevention of falls.

Hazwoper: Awareness, 8, 24, 40 Hour

Hazardous Waste Operations and Emergency Response training focuses on the treatment, storage, disposal, or clean-up of hazardous waste at the applicable level of employee exposure.

Lockout/Tag-out (LOTO)

This training covers the basics of lockout/tagout operations, types of hazardous energy, and procedural steps for proper de-energization. Electrical Safety and Machine Guarding training may be included upon request.

Safety Leadership

This training focuses on becoming a successful safety leader and fostering a safety culture that empowers employees. It is intended for those with some level of safety responsibility.

General Awareness

We also offer over 75 general awareness courses that can be combined for a half to full day(s) training. Take a look at our course catalog for a full listing of topics by scanning the QR code.
